Do you play RA3 now?

I would like to but I just can't allocate my time for it, I finished with the Soviet Mission and I stopped at there till now.

This game is much much better than previous C&C, because everyone have almost similar force/power, you would not feel unfair or one side stronger anymore...

Please go to grab one and start it now.

Moreover now it is available at PS3~

Pirates of the Caribbean 2 Phone Games

Do you play this games? It is fun to play while you're waiting for Train, Subway or people... I finished it few months ago~

It is great because it follows the whole storyline from Movie and you played the roles of Jack. In the games, you fight, you shoot, you runaway with the ship... It is simple games and I think everyone can finish it within an hour without doing other things.

Command & Conquer

A brand new game for CNC series. Played it with fews friend and found that the game is good/nice to play. Compare to previous few CNC series, this one is abit difficult to handle, mainly due to most of the units have very powerful weapon and it need sometime to understand each advantages/disadvantages. Anyway, for me, it is good to play with your friend in cyber or at home.

Some screenshots of the game.

But, I still prefer to play CNC-Red Alert. My all time favorite.

The O.C.

Posted on [April 12, 2007](#) | [1 Comment](#)

The O.C. is my favourite shows in TV. Now I found that there is a games make based on the storyline of this shows. I tried it and it is fun to play with. Try it yourself.

In the game, you may choose to be Ryan, Seth, Marissa or Summer. For myself, I prefer Ryan the most.

Previously when I want to play [Sudoku](#) (An famous Japanese Numbering Games), I need to play it on daily newspaper's games column. Now we can play sudoku easily by our handphone. Current gamesloft come out a [Platinum Sudoku](#) and is very nice.

I think we can actually exercise our brain by playing Sudoku.

Miami Night : Single in the City

Posted on [April 3, 2007](#) | [77 Comments](#)

My friend show me a games named [Miami Night : Single in the City](#) in his Sony Ericsson handphone.

This involves getting a job, building up a group of friends and lovers and generally causing a stir on the social scene. Of course, it's not all delivered to you on a platter. Just like real life, you've got to earn a wage, look after yourself and work hard at maintaining the relationships you form.

Fans of "sims" type games all loved the mobile game "New York Nights". Now, Miami Nights, the follow up to that game is out on and major improvements have been made! But is it enough to make gamers gasp in awe?

Abandonia - Home of abandonware (Dos Games)

Posted on [March 20, 2007](#) | [1 Comment](#)

I think most of the people use computer when pc still using DOS mode. During that time, we have a lot of DOS mode games, such like "back alley cat"... I think most of us almost forgot all of the games...

But, good news is, I had found a website which keep all these kind of games.
